DEVELOPMENT METHODOLOGIES · CHECKPOINT A

MyCampus

A student-oriented guide to everyday life on a University Campus

Ca' Foscari University of Venice · AY 2026/27

THE STARTING QUESTION

“It's my first day here. Where is Aula Delta 1B, and where can I get a coffee before the lecture?”

Today the answer comes from signs in Italian, other students or trial and error.

FIRST USER

An international student in their first days on campus

Exchange or degree-seeking students, or students from another university, who have never been to the Campus Scientifico and may not read Italian.

They know the address and have a phone. What they lack is the mental map other students build over weeks.

Not the first user:
staff, event visitors, students who need an accessible route.

The five questions

1. Where is this room?
2. Where can I smoke?
3. Where is a vending machine?
4. Where is the bar?
5. Where can I heat my lunch?

CONTEXT

Official tools follow the university, not the student's day

Tool or channel	What it gives a newcomer	What is still missing
MyUniVE	Timetable with the room; library and study-room booking	How to reach the room
Sedi e aule · Mappe e percorsi	Sites on Google Maps; map entries per building, including the Alfa bar	Floor and route; vending machines, microwaves, smoking areas
Ricerca aule	Every room with seats and equipment	Floor and directions
Buddy Programme · Welcome Week	Student volunteers and orientation events	Help ten minutes before a lecture

CONTEXT

Two signals that the gap is real

The only microwave was for staff

In the 2025/26 participation process, a student proposal reported that the campus's only microwave was reserved for staff.
The university accepted it and announced two microwaves in the Zeta cafeteria.

Status for us: announced, not yet verified on site.

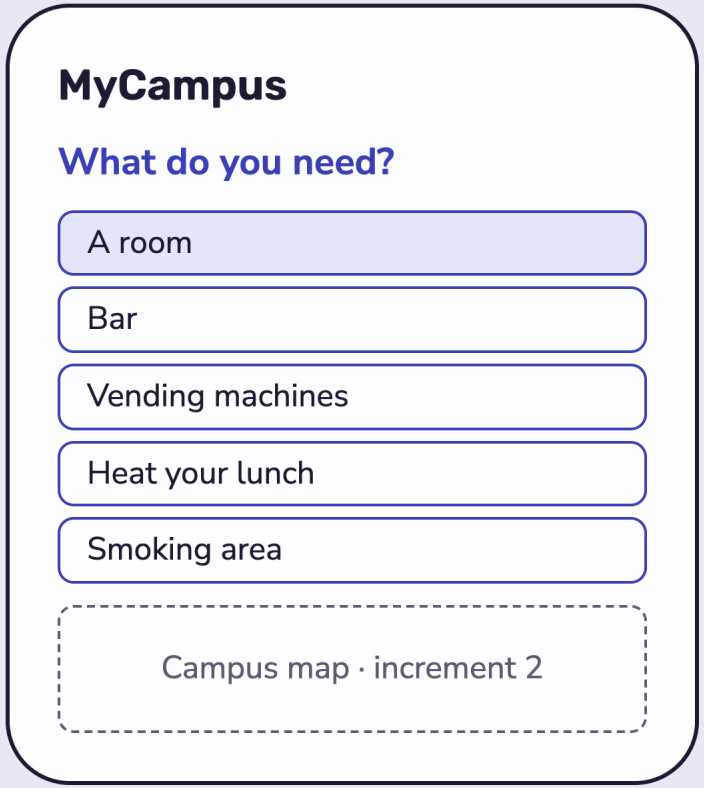

Names collide, and they are in Italian

Aula 1 is in Zeta, Aula Epsilon 1 in Epsilon.
Aula B is a room in Zeta; ZETA B is a floor.
Official pages even disagree on Alfa: nine floors or eleven.

For a newcomer, Aula, piano terra and vending machines are a second obstacle.

FIRST BEHAVIOUR

The home: a guided start and a map

INCREMENT 1

Guided search

Five starting points, one per question. No typing: pick what you need, then the building and the room.

INCREMENT 2

Map

Shows where the answer is. It adds no rule to test, so it waits.

LATER, IF NEEDED

Typed search

Only if the hallway test shows that students get lost in the menus.

FIRST BEHAVIOUR

Guided search: three taps, no typing

1 **What do you need?**
A room, or one of four services

→

2 **Which building?**
Rooms only. Not sure? Browse all rooms A–Z

→

3 **Which room?**
Each item is exactly one verified place

WHAT THE STUDENT GETS

One place
Building, floor and route, with source and date.

Every verified instance
Bars or vending machines, grouped by building.

Not verified yet
Microwave: announced for the Zeta cafeteria. Never “none”.

Not in the list
What we cover, and the receptions in Alfa and Zeta.

SCOPE AND UNCERTAINTY

What waits, and what could prove us wrong

Not in the first increment

- Campus map (increment 2)
- Opening hours, prices, menus
- Professors' offices
- Seat booking: already in MyUniVE
- Accessible routes: flagged “access: check”
- Other sites in Venice and Treviso

What could prove us wrong

U1 · largest. Newcomers already manage with apps, signs and Buddies, so MyCampus adds nothing.

U5. The five shortcuts are the wrong five: newcomers first ask for toilets, printers or Wi-Fi.

U2. Services move faster than we can re-verify them by hand.
